 26. What is a balanced report?

SECTION D

This Section Comprises Long Answer Questions Carry Five Marks Each: (5M×1=5 Marks)

27. Describe the new kind of Bhakti in South India.

SECTION E

This Section Comprises Case Study Based Questions:

(3Mx2=6 Marks)

28. Read the source given below and answer

The sun's heat causes water to vaporise. When the water vapour cools down, it condenses and forms clouds. From there it may fall on the land or sea in the form of rain, snow or sleet. The process by which water continually changes its form and circulates between oceans, atmosphere and land is known as the water cycle. Our earth is like a terrarium. The same water that existed centuries ago still exists today. The water used to irrigate a field in Haryana may have flowed down the Amazon River a hundred years ago. The major sources of freshwater are the rivers, ponds, springs and glaciers. The ocean bodies and the seas contain salty water. The water of the oceans is salty or saline as it contains large amount of dissolved salts. Most of the salt is sodium chloride or the common table salt that you eat.

28. a) What are the main sources of freshwater?

28. b) How are clouds formed?

28. c) What are the forms in which water falls on land?

29. Read the source given below and answer the question that follows:

Television has enabled us to think of ourselves as members of a larger global world. Television images travel huge distances through satellites and cables. This allows us to view news and entertainment channels from other parts of the world. Most of the cartoons that you see on television are mostly from Japan or the United states. Television has brought the world closer to us.

29. a) Which privilege did television enable us to get?

29. b) How does a television image travel huge distances?

29. c) Most of the cartoons we see on television are from?

SECTION F
